

Minimum installation requirements for SE Client

Ver1.6

Company:

Server name:

Date:

Please tick the required yellow box to indicate minimum server requirements have been met, prior to an installation. One sheet per server required.

System	Minimum Requirements				Installed
Processor	Intel PIII-500Mhz for a standard file & print sharing fileserver with data to be protected up to 50Gb. Intel P4-1Ghz for file/print/database server with data to be protected between 50Gb to 200Gb. Intel P4-2Ghz for file/print/database server with data to be protected between 200Gb to 500Gb size. Intel XEON Dual 3Ghz for file/print/database server with data to be protected at 1Tb and above.				
Diskspace	50Mb + local cache & temporary files. For a file & print sharing fileserver the local cache can be as large as backup selection ie 10Gb selected could require up to 10Gb of extra disk space. For a database server, space will be required for a data dump which is equal to the size of the database as well as space for the compressed database in the cache ie 20Gb selected could require 20Gb for the dump space and 10Gb for the compressed data in the cache, thus extra space required is 30Gb.				
Memory	512MB RAM free memory for up to 50Gb of protected data, 1GB RAM to 500Gb Protected data & 2Gb RAM for 500GB of protected data and above (ie Minimum memory requirements are stated as being above the requirements for operating system and application requirements on the server).				
Display	800 x 600 resolution with 256 colours.				
Operating system	System	Installed	Minimum Patch level		Installed
	Windows NT4		Service pack 6a		
	Windows 2000 Server, Professional		Service pack 3		
	Windows XP Professional		Service pack 1		
	Windows 2003 Server		To the latest patches		
	Novell 6, 6.5		Service pack 2		
Plug-ins	Application	Minimum Patch level			Installed
	MS Exchange 2000, 2003	Windows 2000 server SP3, Exchange 2000 SP3 (Is the Exchange in a cluster? Yes [] No [])			
	MS Exchange 5.5	Windows NT4 SP6a, Exchange 5.5 SP4 (Is the Exchange in a cluster? Yes [] No [])			
	MS SQL 2000	Windows 2000 SP3 or Windows XP SP1, SQL 2000 SP2			
	MS SQL 7	Windows NT4 SP 6a or Windows 2000 SP3, SQL 7 SP4			
	Sybase ASE 12.5	Windows 2000 SP3			
	Lotus Domino 5, 6.5	Windows 2000 SP3, Lotus Domino 5.0.11			
	Oracle 8i	Windows 2000			
	Oracle 9i	Windows 2000			
	Open File manager	Will you require OFM to be installed and configured? Please tick → → Yes? <input style="width: 20px; height: 15px;" type="checkbox"/> No? <input style="width: 20px; height: 15px;" type="checkbox"/> (NOTE: OFM will not be required on XP or 2003 systems as VSS will be used)			
	Firewall Management	The server that will have the SE client installed on will require a permanent connection to the Internet. If there is a firewall between the server and the Internet, you must ensure that TCP ports 443 and 8443 have been opened prior to the installation of the SE client. Please confirm this has been done → →			Ports Open?
